**The Pitfalls of Changing the System Clock, Software Virtual Clocks Come to the Rescue**

### **The Pitfalls of Changing the System Clock, Software Virtual Clocks Come to the Rescue**

**Blog Post: Friday, August 12, 2021**

Software virtual clocks can target different groups, users, and processes with multiple virtual times. Software virtual clocks enable developers and testers to "self-serve" time travel by themselves instantaneously, without the need to wait for an infrastructure team to shut down/restart and change the system clocks. Databases and applications would see the virtual clock immediately and then shut down and restart as needed. This would make developers and testers much more productive and save them hours or days per time change. It also relieves the infrastructure team of working overtime hours and gives them more time to work on other tasks.

### Two Large German Banks Merge: Time Machine Meets Challenges & Needs in Major Migration & Consolidation Project

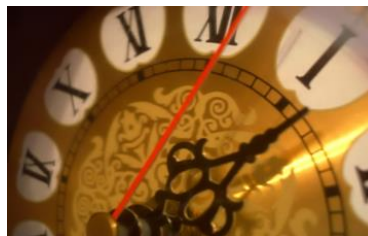

### Two Large German Banks Merge Challenges & Needs in Major Migration & Consolidation Project

SolutionSoft System’s Time Machine provided the combined large banking organization an easy process for integrating all data, applications, and servers. The bank utilized Time Machine across all their UNIX, Linux, & Windows testing platforms with more than 1,184 servers. As a result, the 1,600 applications were tested successfully and the project was finished within the 18 month deadline.

**At Solution-Soft, customer projects delivered on-time is our #1 priority!  
We pride ourselves on providing outstanding Customer Service and Support and are thrilled with all of  
the positive feedback we get from our customers.  
Scroll down to read some recent Customer Testimonials below.**

"Time Machine is a great test solution for our cloud native bancX SaaS offering. When we launch our financial products, we need to be certain critical time-based functionality works. When a customer integrates our products into their IT stack, we know we rely on Time Machine to validate functionality before they go live. Win-Win for both us and our customers"

*CEO of Radix Financial Software  
Parent Company of Qualica*

"AIG is saving 80 – 100 hours per month by adding Time Machine to our testing and development environments!"

*VIP of Application Development  
AIG*

"Time Machine saves time and reduces our stress. We now cover all of our critical time sensitive functionality in the most efficient way possible. Time Machine helps Together Money to meet its delivery date. Time Machine Sync Server facilitates true test automation for its banking applications which results a big cost reduction on deployment."

*Lead Test Manager  
Together Money*
